Summary

Computer Science and Engineering undergraduate (AI/ML) and Oracle Certified Professional in Java SE 17 with a strong foundation in data structures and algorithms and a focus on building reliable fintech backends. Built a banking API that keeps money safe under concurrency, retries, and failures, and an AI agent that investigates card fraud on real transaction data. Writes well-tested, documented code with CI, Docker, and live deployments.

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, C, C++, SQL, Kotlin
Algorithms & Design: Data Structures, Algorithms, Union-Find, BFS, OOP, REST API Design, System Design
Backend, Web & Mobile: Spring Boot, FastAPI, Node.js, React, PostgreSQL, MongoDB, Android (Jetpack Compose)
Testing & Debugging: JUnit 5, Mockito, pytest, Vitest, Playwright, Integration and Concurrency Testing
Fintech & AI: Transactions, Idempotency, Concurrency Control, Fraud Detection, LLM Agents, RAG
Tools: Git, GitHub, GitHub Actions (CI), Docker, Docker Compose, Linux, Postman

Experience

Salesforce Intern, SmartBridge May 2025 – Jul 2025

- Developed CRM application features using custom objects, validation rules, application logic, and automated business workflows built from functional requirements.
- Tested application behavior, validated data, and debugged functional issues to improve reliability.

Projects

SecureBank – Digital Banking REST API and Web App GitHub
Java 17, Spring Boot 3, Spring Security, PostgreSQL, React, TypeScript, Docker, GitHub Actions

- Designed a layered REST API with consistent status codes and one error format, covering accounts, fund transfers, JWT authentication, role-based authorization, and paginated statements.
- Solved real concurrency problems: atomic transfers with rollback, optimistic locking against lost updates, and idempotency keys so retried payments never move money twice.
- Wrote 84 unit and integration tests, including parallel withdrawals and forced mid-transfer failures; shipped with CI, Docker, and a live deployment, and documented every design trade-off in the README.

Gem Cascade – Match-3 Puzzle Game GitHub
JavaScript, HTML5, CSS3, Node.js Test Runner, GitHub Actions, GitHub Pages

- Built a game engine that detects L and T shaped matches with union-find, resolves chained blasts with breadth-first search, and keeps boards playable with seeded Fisher-Yates shuffles.
- Balanced level difficulty with a headless simulator that plays hundreds of games per level with random and greedy bots, backed by unit tests in CI.

Agentic Fraud Investigation Agent – TigerGraph Hacker House Goa 2026 Challenge GitHub
Python, LangGraph, TigerGraph (GSQL), Pydantic, Streamlit

- Built an agent that investigates card fraud on IEEE-CIS transaction data, gathering evidence on transactions, devices, and identities from a knowledge graph through 10 GSQL queries.
- Kept fraud pattern detection and the policy engine deterministic and separate from LLM reasoning, so every recommended action is reproducible and auditable; ran all 20 benchmark cases end to end.

FinPilot AI – Android Personal Finance App *(In Progress)* GitHub
Kotlin, Android, Jetpack Compose, Material 3, Navigation Compose, StateFlow

- Building an expense, budget, and reports app with MVVM, ViewModel and StateFlow, type-safe navigation, and a custom chart; money logic lives in a unit-tested domain layer, stored as integer paise.

Education

SRM University AP Aug 2023 – May 2027
B.Tech in Computer Science and Engineering (AI/ML), Amaravati, Andhra Pradesh **CGPA: 8.57/10**
Minor in Marketing
Relevant Coursework: Data Structures and Algorithms, Software Engineering, Compiler Design, Automata Theory
Mahodaya Junior College, Visakhapatnam – Intermediate / Class XII (2022) **Percentage: 89.9%**
Bhashyam High School, Visakhapatnam – Class X (2020) **Percentage: 99.67%**

Achievements & Certifications

- Team Finalist (top 45 of 260 teams), SIH 2025 Internal Hackathon, SRM University AP
- Pitched a ChatGPT verification layer to catch hallucinated legal answers, Idea Bootcamp 2.0, E-Cell SRM AP
- Oracle Certified Professional: Java SE 17 Developer (2026); MongoDB Associate Developer (2026); Foundation For Excellence – Amazon Future Engineer Scholar, Cohort 3
